

Timing diagram for Old Bridge

All units will enter the floor from the front right and exit from the back left as viewed from the spectator side. Upon entering the floor, each group will be able to use the entire right quadrant (side two as viewed from spectators) to set up prior to total “show time” starting. After completing the performance, the vertical center timeline shall be utilized to determine group is off the floor when all *equipment and personnel* are to the left of the vertical center timeline (as viewed from spectators). Please move quickly to the exit area.

All units will be moving to the outside after their performance. There will be tents and protective covering in the event of inclement weather. HOWEVER, units should be prepared to have the proper coverings available for the reload process. Details regarding this process will be included in the director information.

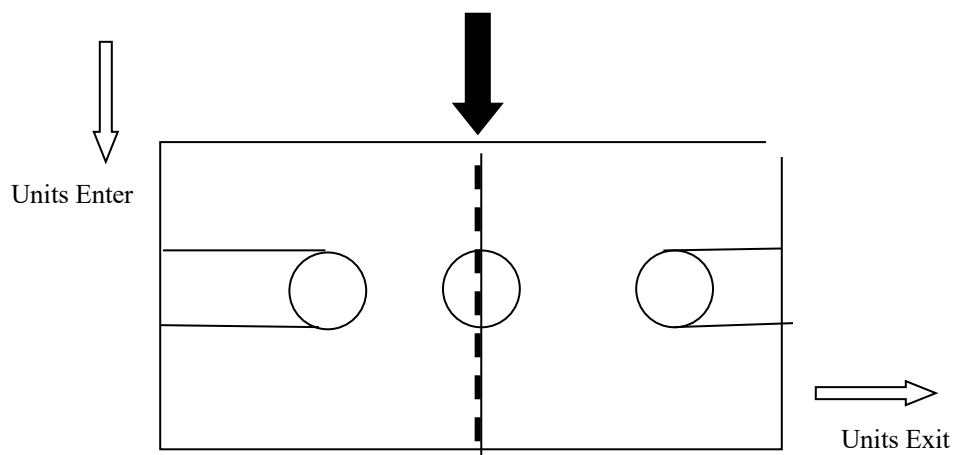

Questions or clarification regarding this procedure should be directed to Tom Kelly @MAPS 215-840-0816. Do not wait until the day of the show for clarification.

The timing and penalties judge will help facilitate this process.

Total available floor 60X90 ft.
