

Timing diagram for Unionville

All units will enter the floor from the **right** and exit to the **left**, as viewed from the spectators (see diagram). If there is favorable weather, groups will exit directly to the outside to load.

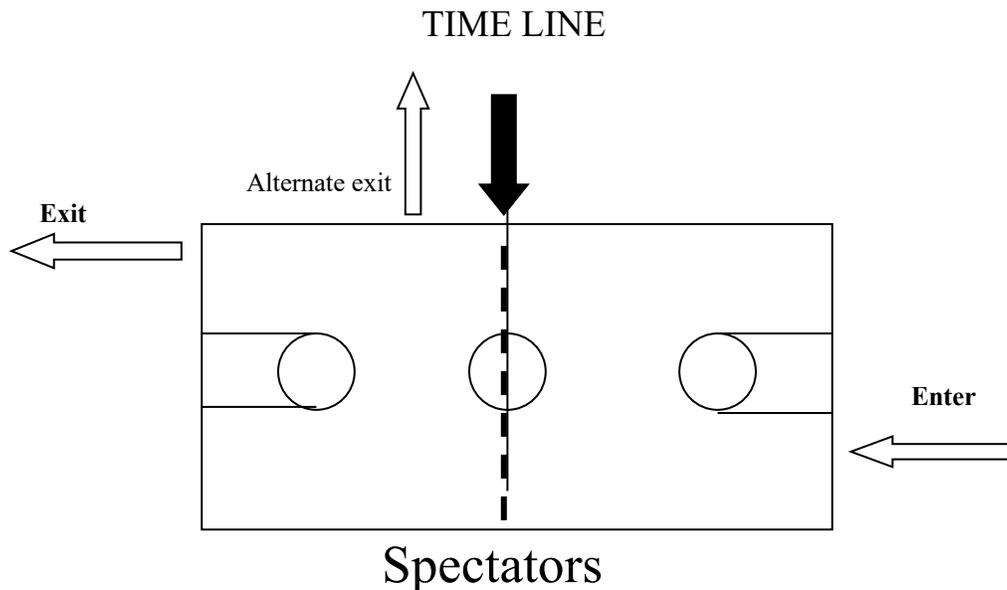

Upon entering the floor, each group will be able to use the entire **right** quadrant (side two as viewed from spectators) for set up prior to total “show time” starting. After completing the performance, the vertical center timeline shall be utilized (regardless of exiting to the outside or exiting to the alternate center back) to determine groups off the floor when all **equipment and personnel** are to the **left** of the vertical center timeline.

If weather is not favorable, units will exit backside “center” (see alternate exit). Equipment will be taken back through an alternate inside route. Please know that other performing groups will be coming through this area as well. Clear area promptly.

Questions or clarification regarding this procedure should be directed to Tom Kelly @MAPS 215-840-0816. Do not wait until the day of the show for clarification.

The timing and penalties judge will help facilitate this process.

Available floor space 67 x 108 ft with 9 rows open in back

**NO FLASH PHOTOGRAPHY DURING UNIT PERFORMANCES.
PLEASE ADVISE STAFF, PARENTS, AND CREW**
